8 Miles. Te Kahui Tuesday March 1 "1892.

Such confusion raged around the place that we were compelled to make an extra early rise; as all were getting ready to go up to the Wedding Break-fast. we got an Invitation to go up but took A precotion and got our Breckfast before we went up as we thought that we might not be wanted, which we found to be the case almost before we had reach the place where it was to be held. as we met the Minister who was to Marry them and he turned away at sight of us and went another way. we payed no attention to his work but went on when he came on took the Cupple off to the School House and Married them not allowing the Parrients of the Bride nor the Bridegroom to see the Proceedings. but when the Marrage was over he brought them back to the Wakaii First and for the People to gratulate them. on seeing how things was going through we left I went into Taumata and got my things and then went out side and put in the Day writing on my Home Mail there being nothing agoeing on here only some few to work on the Whare Kai for the Hui Tau, so I had it all to my self.

A Meeting. Te Rahui Wednesday March 2 "1892.

We were very bissy in the Morning hunting up some whome had gotten into truble to try and settle the same but were unable to get them togeather so we spent the Day at our work studing in the Evening we were kept bisy at the Wednesday nights Meeting which was fine there being A large crowd present and all seamed to be anxious to speak, there being some sixteen of them that took the chance and expressed A good Idea to do there duties to the best of there ability. after Meeting we had A long talk with Knawn and some of the Saints untill the late Hours of Eleven Twenty.

A Meeting Taumata Thursday March 3 "1892.

to Miles The heavy old spat of Sandrus foot was the first sound we hird it being just at Daylight calling us as it is to far to the call Bell, we had hardly time to get dressed when the Bell rang and we had to hunt up those who were in truble but all had its turn so we hunted them up and had A long three Hours bout one talking and then another untill I thought it never would quit but we got them stoped and give on my discision after which there was piece for some time and we got it settled in prelly good shape. the main reason

it stoped when it did they were getting real hungry and we were right with them so it stoped for the present. and all being left in peice we went inland on our arival we found all laying around waiting on A Saw so we spent our time in talking with them untill after Sun down when we came into our little Whare where we purtook of some Potatoes, and A Water Mellon after which we came in at the call of the Bell to the Evening Meeting where the Saints did not feal much like talking nor did they do it as there was only three that got up so we Bro Taylor and I had the time which we occupied in good shape and after we got done there was some four wanted to get up but we objected as they would not take the chance when they had it and it was now time to let out and we were not agoeing to over do the Meeting now as we would not of spoke had the time of bin occupied by them when they had the chance. we then came into our little place and had another feast of Water Mellons brought in by one of the Saints so after such A waking up we set into writing and I wrote A Letter to Mr and Mrs William Phillips and then we soone found our good little Bed's and were soon sound asleep.

Taumata Friday March 4 "1892

There new Saws having arived and the men all being as andious to begin there work Sawing. there for we were aroused at there confusion it being so close to our Dinner, After all was over and we had done Breakfast we went out and sharpened up there Saws and not knowing how sharp they wanted them we got them to sharp. but it was soone fixed, they then brought out An old rusty Saw and we were nearly Day working at it but we got it fine. we had A quite A time trying to show them an easier way but made no headway as they thought they new all and there was no telling them any thing. the Evening was spent in Reading Bro Taylor having gotten soon sad dust or Rust from the old saw he was suffering terrable with sore Eyes and soone went to Bed with the Same almost Sick.

S. Miles. Taumata Saturday March 5 "1892.

Confusion still raged out side but I had no time to pay any attention to the same as Bro Taylor was sick with his Eyes and not feeling well other ways. My first duty was to go out side to Te Kahui and get some things which I had left and to see the Saints finding all well I soone came back, on my Road calling at some few places and

seeing how the people were, and to get some good Mellon to take up to our place for Sunday. on my return I found Bro Taylor up and moving around so I put in studing untill Bed time, not getting any thing but A dish of Potatoes they were settling fast and tomarrow is the general fast day so I soone placed my self in my little bot for the night.

2 Mutings. Taumata Sunday March 6th 1892.

A lovely morning has once more presented its appearance and our general fast day has wound its self around so all is nice and quied as they are all tired from the past weaks work. so we got A chance to take a good long lay. on this kind of an occasion they are all very anxious to start school some little earlier so that when it is out they can all make A brake for the food or getting it ready by or before Twelve Oclock. At Ten A.M. the Bell was sounded and all was present as the Sacriment is Administered in the School on these Occasions and they have all bin tought to come and receive it if they dont come after warde. we put in the full Day of it in fasting so we just waited for Meeting and after that we. to Supper and passed the rest of the Day Reading.

35 Miles. About five A.M. I arose

1 Hulin. so as to be able to get Breakfast and get an early start for town, F. Kala came down to the House to see me with me and give me a bottle of milk and a piece of Pork and some other thing as I was going to thank him and he give me them to help me and that I might remember him and his goodness to me as it was a Raining I was some what worried and mad for fear that the small Rain that I had would not be able to part me and my things down to Gilroy. but not getting any assistance from the other side of the house I resolved to just make the best of my chance and take the Rain that I had got and go down to town, So after bidding all my boys I shouldered the bag and away I went out of the old House "Lodge Pole" with the thought in my mind that I would never see the place again as I soon expect to cross over before morning Rain after a long and tedious ride of Nine Hours in the Rain was I

so I made tracks for there and arrived just in time to get on when the first boat of the large Steamer that was moored out in the "Bay" we had a rough trip out some of the boys were getting quite sea sick, I had not been on board of the large boat but a short time until the "food" that I had just ate came up and all the other that it was possible to bring up for I turned "green" and never was ashamed there trying to get something up but would not come for a long time when it did we were for a few hours and then we came into a rough piece of sea just as we came past the point of the "Waikiki Peninsula" and my mouth of having gotten again commenced and kept up for some time until I was so sore that I could hardly swallow and then I was quite thirsty.

On The Ocean Saturday Oct 22nd 1892.

205 Miles.

At about Four o'clock the Steamer arrived at Napier and anchored out in the "Bay" when the boat was stopped I felt much better and wanted to eat once, but

about four A.M. the small boat came out from the shore and brought out a large log boat loaded with the Remains of a large Open boat that was wrecked on the coast above. We were up during the day on Watch and were making the Vessel up on the Wreck of the boat working with the Carpenter and Sailmaker the remains of the large Vessel was Cleared out in the Bay. When about Five we saw some Natives coming down to the Beach on their Long Canoes in Search and then was another large canoe came along side of us we filled up in good shape, Lost at half past four. They pulled up the Anchor of our Vessel and we started out of Nootka Bay and Sailed for Cape Flattery. But I had to leave what little Rest of Time I had as the Ship was rather rough over the Bar was not so heavy by Cape Flattery. We got up under the Land and Sailed and Steamed for about Seven miles when I left a Native Pilot and got off at Eight and Five the Light passed.

Wellington Sunday Oct 23rd 1872.

4th Mile

About Six A.M. I arose and upon looking out saw that we were in sight of land on the side of the Channel and we were sailing along for the space of an hour or so I saw the snowy peaks of the Mountains of "Kaikoura" the Middle Island, show up above the horizon more & then now that I was amazing my destination on the "Hinemoa" And at nine o'clock we came in sight of Wellington the Capital City of the New Zealand Colony. Our Boat was shortly afterward in the Harbor and standing by the side of a nice Wharf which was crowded with people all waiting to see the arrival of the "Hinemoa" Boat and there I put up at the Railroad Hotel where I found a room to bring my things down to the "Railroad" Hotel and there I put up at that was not time to see to dinning, I then carried my self down to writing out my journal and got it up to date as I had not been able to do any writing for some time back. In the afternoon I met a large number of Friends all gathering down by the wharf when I got to the Railroad Hotel and took it in my hand to Letter them

and took it down for me, On arrival at
"Junction" I met a Train which took me
way to the Dutch place so I found Dammit
no difficulty and was gratified received by
all although they were not expecting me up
that at that time not to come in Billington.
I got my small box and took some of
my belongings out and then packed it up and
and was getting ready for the good train
and having a pleasant talk with them
Mr. P. & D. & then went back to the depot and
met the train one hour for that is Chatsworth
where I arrived at Seven Thirty and was to
have Hour by Mr. & Mrs. P. Thomas and D. Graham
but they came right to the depot and did not
see me and then they went back not seeing
me as I was left to work my own way as
which I done with no bother as the Junction
place was right by the depot so I took a walk
over to the place and then I was met by
some of the good people of the place as they
deemed to know me from the time I was last
I stole they were Mr & Mrs Thomas and Graham

know that I had arrived and we were all united in a large family reunion after which I became ill and my illness, that is pleurisy, with complications, lasted about three weeks, when we started

I then tied up my wild horse to take a ride down to Kotukawa and get some Kapa but just as I had got him ready one of the Saints told me that he would go down and get them for me to save me the trouble if I was willing for me to do this that I could not find them so I gave in to him and came and read the New Testaments and then wrote a letter to Dr Wesley Gibson for
